The vacation tour continues with the great weather and sites. Wish you could all be here to enjoy with me (bring warm outer gear to enjoy it more, and some nose clips). Some views to convey the concepts more clearly. The little EPA Command Post wagon does work well since it allows us to keep PCs charged and is a place to lay things out. My image of the wind country is still lacking something to be desired.

Drilling setup at CD-04 P1010119.JPG

Cheers to all in this holiday season!!!!!!!!!!!!!!!!!!!!!!

René
